

*Inspired to Make a Difference!®*

Are you looking for a business opportunity that helps disadvantaged people to uplift themselves through education?

An opportunity where students can study from their mobile phones, anywhere and at any time?

An opportunity where you earn residual commission month after month without having to do any more work for that sale?

An opportunity that you can manage from anywhere, at any time from your cell phone?

An opportunity with no stock, no deliveries, no signup costs or monthly fees?

An opportunity that allows you to build a network of Suppliers, from whose sales you also earn commission?

An opportunity that you can work when and how it suits you?

An opportunity where you can earn your true worth and there are no limits as to how much money you can make? The Sky is the limit!

An opportunity with free training to help you become successful?

If you like what you've heard so far, you've found what you are looking for, so let's get into some of the details;

Pocket Classrooms offers a unique business opportunity for those wanting to take charge of their life, their income and their future!

You can sign up as an Independent Supplier and start earning right away! A Supplier is simply any person that registers for free and gains the right to supply the Pocket Classrooms product to interested students and the business opportunity to those wishing to make some extra money.

Here's how it works. Sign up and you will receive a welcome email with your login details for your account. If you don't have an email address, get one for free via gmail.com. You then

download the app for either Android or iPhone and once you log in, you will be able to access training on what to do next. We provide you with free training and support to help you become successful! We supply the vehicle and the only thing needed is for you to drive it!

As a Supplier, you will have two goals, the first is to build a network of students and the second is to build a network of other Suppliers that become part of your team.

Building a network of students means you promote the Pocket Classrooms product to potential students and once they sign up, you receive a 25% ongoing sales commission every month as long as they remain a student and you remain a Supplier. For them to sign up as a student, send them your student sign up link from your App and once they click on it and register, they become part of your student team and are linked to you as their selling Supplier. After that, you receive a commission every month based on the fees paid by all the students that you have signed up. Your commission is paid into your bank account every month, for the previous month.

To become a Supplier, there are no signup or monthly fees. All you need to do is enroll the equivalent of 1 student per year to remain active.

Your second goal is to build a Supplier network. This means recruit other people just like you that want to also become Suppliers. To recruit them, send them your Supplier link from your cell phone App and once they click on it and register, they become part of your team and you receive 5% commission off all their sales! That's right, you receive a commission based on all the sales that they make, month after month, year after year without you having to do any more work to make those sales! Bear in mind that you make no money by simply signing people up and only do so once they register students. The money and commission you earn only flows from students being enrolled into Pocket Classrooms. So whoever you sign up also needs to enroll students for you to earn off their efforts.

Once you have the App, you can access links to send to those you know and also those you don't know directly, anywhere in the country. These are unique links that connect your student and Supplier signups to you and can be sent to potential prospects via Whatsapp, email, Facebook, Instagram and other social media programs. Don't worry, it is very easy to use and full training is provided. Also, your sponsoring Supplier will support you with any questions you may have and will show you how to do this.

So who are your potential customers? The students you register are teenagers or adults that never finished school or those that want an easy, practical solution to be able to complete their schooling via an Android mobile phone or Android tablet. They can study from anywhere, at any time! To better understand the Pocket Classrooms student offering, watch the video on this website titled "Want to know how to finish high school via your cell phone?"

So who are your potential Suppliers? They are anyone that wishes to earn some extra money, just like you. Both students and Suppliers need to have a reliable smartphone and the will to succeed! As it costs nothing to become a Supplier, they have nothing to lose and everything to gain! Suppliers can use the App for either Android or iPhone to build their businesses, whereas students can only use Android cellphones and tablets.

All students pay their monthly fees directly to Pocket Classrooms and you will be able to view your monthly commission report that shows all your students' and Suppliers' sales that make up your monthly income. By the 7th of each month, you will be paid for all your sales for the previous month by bank transfer. So you will need a bank account if you don't have one.

To recruit other Suppliers, simply refer them to our website that you can use to help you build your business. Your App will have a link that you can send them and when they click on it, they will be taken to the page that offers the "1 Minute Presentation". They will read that and if they like what they see, they will go on to the next step and watch this video. If they are happy with that, they will watch the second video that talks about how they can become rich! After that, to gain a better understanding of the student offering they will probably watch the student information video titled "Want to know how to finish high school via your cell phone?"

If you deal with prospects that don't have access to the internet, you can keep all three videos on your cellphone to show them whenever you like. Underneath each video on this website you will see a download link. This allows you to download the videos to your cell phone and be able to show them to others if they don't have internet access.

Once you send a Supplier or student a link from your phone's App and they register using your link, they are linked to you automatically. So always make sure anyone you refer always clicks on your Supplier or student link that you sent them so that they are linked to you as a Supplier, otherwise, they won't be linked to you and we won't know where to pay your sales commission!

On the pocketclassrooms.info website, your prospects will be able to access more information about the student Fees and the Curriculum. Remember, you don't handle any money and all fees are paid directly to Pocket Classrooms.

It's so easy and is free to get started as a Supplier, simply ask the Supplier showing you this video how to get up and running right away and be sure to click on the sign up link they sent you before you register.

Can you see how easy it is to earn money with the system we have created for you? You don't need a flip file or laptop or know how to give a fancy presentation. You don't need to memorize facts. All you need to do to build your business is use this system to present the opportunity on your behalf. Show your prospects the website and videos and let the videos do the presentations for you! Once they have watched them, you can then answer their questions. And if you aren't sure about some of the answers, you can get back to them after asking the Supplier that enrolled you in the business.

Once you are ready, you should watch the second business opportunity video called "How To Be Rich!".

Thanks for watching!
